*Election/Restrictions*

1. Claim 12-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 19, 2005.

New Claim 17 is also withdrawn from further consideration because it is drawn to the process of Group II (non-elected).

New claim 18 will be examined.

The election of species from Groups A-K is acknowledged.

2. Applicant's election with traverse of Group I in the reply filed on 8/19/2005 is acknowledged. The traversal is on the ground(s) that the application is a 371 national stage entry in which the rules of unity apply. This is not found persuasive because the application is not a 371 national stage entry. The application is continuation of a PCT.

The requirement is still deemed proper and is therefore made FINAL.

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 1762

a) Claim 6: water (elected) is added to the coating mixture, thus increasing the reaction rate;

b) Claim 7: water (elected) is added to the reactive H dispersion, thus decreasing the reaction rate;

c) Claim 8: 1, 6-hexanediisocyanate (elected) is added to the reactive H dispersion, thus decreasing the reaction rate;

d) Claim 9: a low MW polyisocyanate-functional cpd is added to an isocyanate functional polymer, prior to mixing with the reactive H dispersion, thus decreasing the reaction rate;

e) Claim 10: an (poly)aldehyde or (poly)ketone is added to the reactive H dispersion, thus decreasing the reaction rate.

APPLICANT IS REQUESTED TO ELECT ONE OF a), b), c), d) or e).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claim 1 is generic.

Art Unit: 1762

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to Janeen Vilven on September 29, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1762

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The examiner can normally be reached on 8:30-6:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
